

Dramatic Changes Are Demanding Improved Quality Of Healthcare Including Greater Accessibility And Improved Cost Effectiveness.

Interprofessional teams work together to facilitate safe and effective care transitions.

The Center for Interprofessional Education and Collaborative Care, in partnership with VCU Office of Continuing and Professional Education, is offering a 15-credit post-baccalaureate graduate Certificate in Care Coordination starting in Fall of 2017. Courses will focus on healthcare delivery in Virginia and will be offered online with an in-person weekend introduction and final capstone presentation.

Learners will gain a better understanding about:

- Interprofessional Communication Strategies
- US Healthcare and Care Coordination
- Healthcare Payment Models Impact on Care Coordination
- Ethical and Legal Considerations
- Hospital-Based Care Coordination
- Community-Based Care Coordination
